THE ARCHITECTURE EXPERIENCE

Trevi Fountain in Rome, Italy

AN EXPERIENTIAL LEARNING COURSE
TO UNDERSTAND CONTEXTUALISING
ARCHITECTURE IN EUROPE

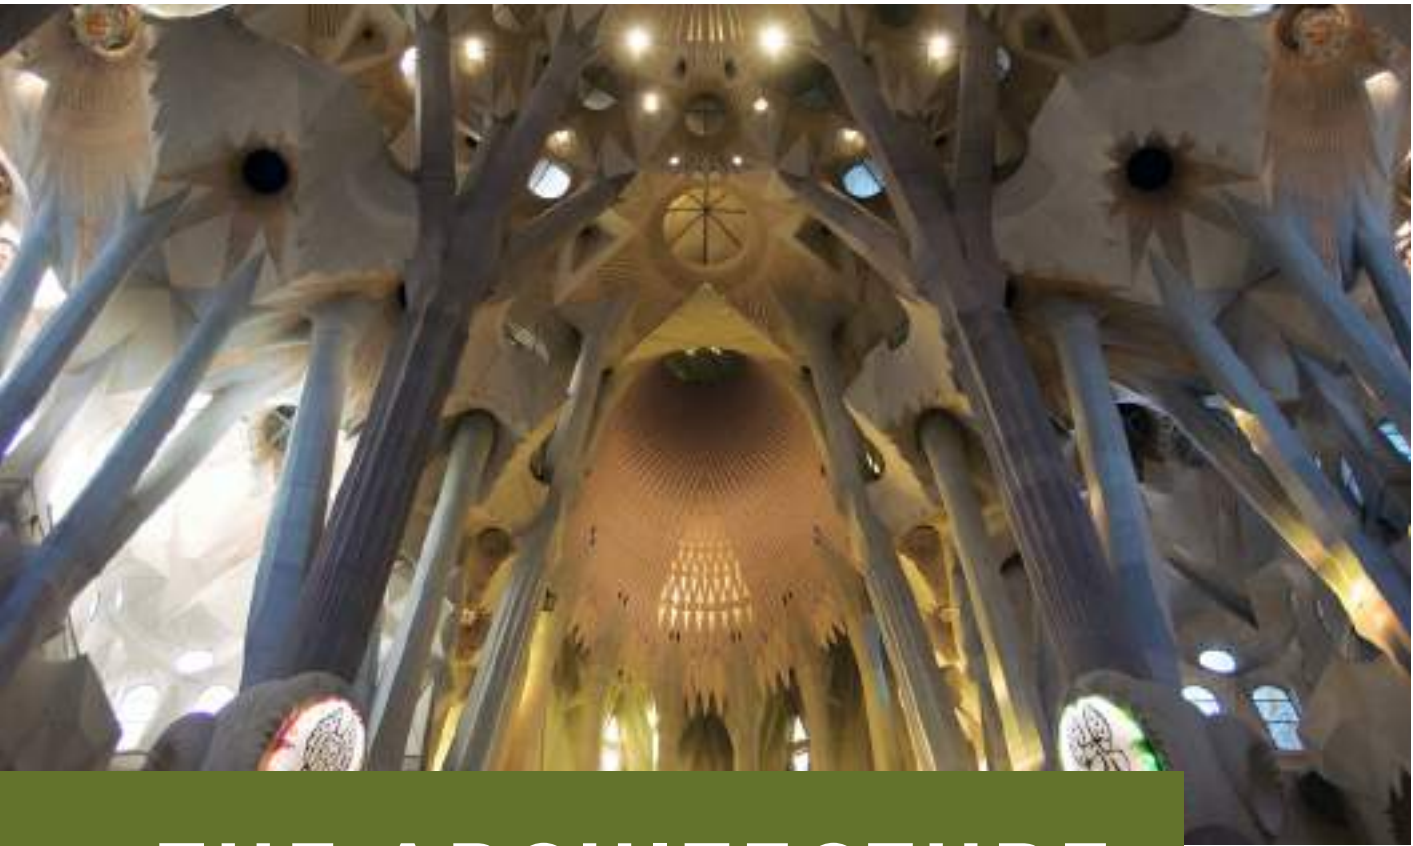

Casa Mila by Antoni Gaudi

CONTEXTUALISING ARCHITECTURE

European architecture is an amalgamation of art, architecture, history and design. Over the centuries, there have been many different influences and architectural styles developed across Europe. From the Renaissance, Gothic and Baroque to the Art-Deco, Modernism and Futurism movements, Europe is a fine example to understand the history and development of architecture in a global, contemporary context. Participants will get to visit sites showcasing different architectural styles. This will help in understanding the incorporation of aesthetics and form along with the function, context and surroundings of each site.

Antoni Gaudi

THE ARCHITECTURE EXPERIENCE

Sagrada Família
by Antoni Gaudí

The best approach to growing as an architect is to learn from experiencing and observing. *The Architecture Experience* aims to do just that. Participants get to observe contextual architecture through site visits and interactions, and document the learning in a themed narrative for later referencing.

“

**15 DAYS,
20 PARTICIPANTS,
4 CITIES**

”

These visits will focus on observing and learning about the importance of contextualising architecture, the history of different architectural styles and techniques, importance of design, its influence on architecture around the world, sustainability and other aspects which draw scores of visitors to European architecture. The visits will foster a deep understanding of city planning, old architecture and its conversion to new, mobility driven infrastructure, while working on a documentation project across different themes.

up pavilion design

CAPSTONE PROJECT OVERVIEW

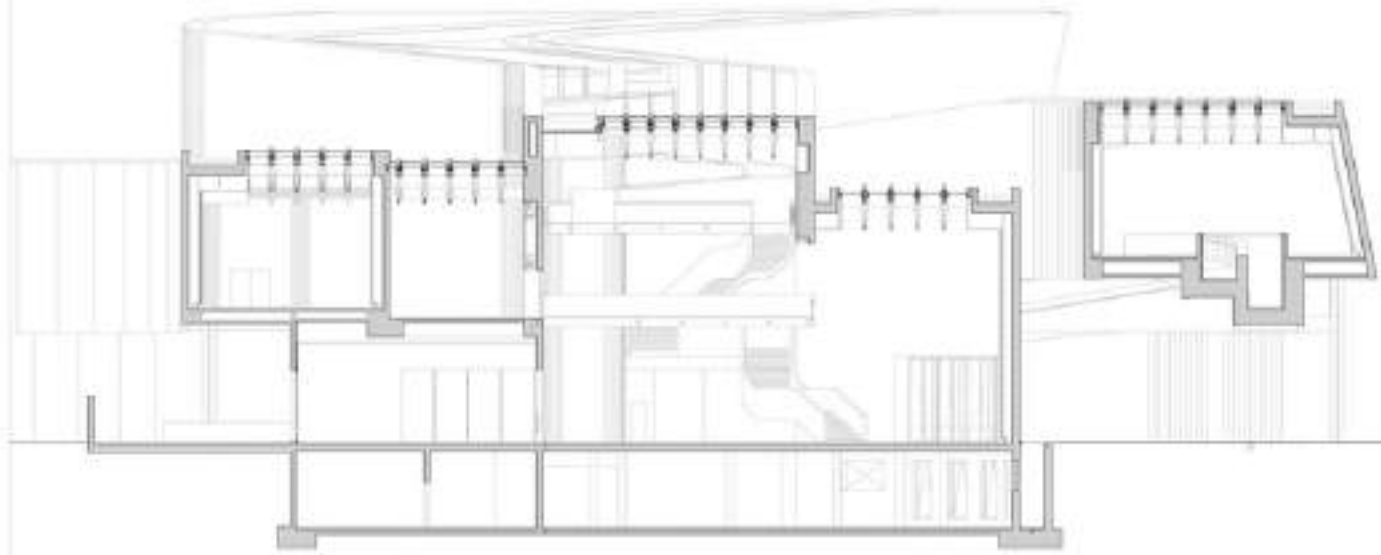

The Architecture Experience is designed with the intent of enhancing architectural understanding. To this end, a short project is included as part of the experience. The idea of the project is to refine an existing project with the ideologies of integrating traditional methodology in contemporary architecture.

“

**PRE-TOUR
ASSIGNMENT,
ON SITE
OBSERVATIONS,
PROJECT REVIEW**

”

This project will include a pre-tour assignment. Participants will be given an existing project in which they will have to conduct a basic SWOT analysis and identify areas that could be enhanced by ideologies of how to contextualise architecture. When on the tour, participants will review their on-site notes and observations and highlight important aspects that could be relevant to adapting and improving their own projects. At the end of the tour, participants will prepare and present a conceptual revision of the projects which will then be discussed and reviewed by the curator. The discussion will cover the feasibility and impact of their design modifications and how to proceed post-trip.

WHAT IS IN IT FOR ME?

Section Design of MAXXI - National Museum of 21st Century Art by Zaha Hadid Architects.

Participants get to understand the influence of history, art and design in architecture across different periods, and observe how sites are adapted for today's use. Participants also get to understand how sustainability is approached in the projects visited, and the solutions devised.

From a learning perspective, participants get to understand how their domain of interest approaches sustainability in the urban context, and how they can work towards Sustainable Development Goals in their projects.

At the end of the Experience, participants will have an improved practical understanding of what they study in college and learn how to implement these strategies into their own projects, enhancing their portfolios.

Participants also get internship opportunities from our partners, and the more innovative their design proposal is, the better the chances of getting the internship.

**“RELEVANT
PROJECTS,
INTERNSHIP
OPPORTUNITIES,
UNDERSTANDING OF
CONTEXTUALISING
ARCHITECTURE”**

EXPERIENCE OVERVIEW

DAY 1

Arrival in Paris, France.

Orientation on the structure of the tour visits and project. Finalisation of teams, and the participants' individual roles and responsibilities within the team will be defined.

Places to visit: Neighborhood exploratory walk, Eiffel Tower (outside visit).

DAY 2

Topic of Discussion: History and transition of French architecture over different periods – Renaissance, French Baroque & Classicism, Rococo, Neo-classicism, Art Nouveau and Art Deco.

Places to visit: Bibliothèque Nationale de France (public access areas), Louvre Museum, Communist Party Headquarters (outside visit).

Cultural Visit: Notre Dame Cathedral, Saint Chapelle.

DAY 3

Topic of Discussion: Haussmann Architecture and its influence on modern-day Paris.

Places to visit: Les Docks: City of Fashion and Design, Centre George Pompidou, Fondation Louis Vuitton, Philharmonie De Paris (outside visit).

Cultural Visit: Palais Garnier, Place De La Concorde, Arc De Triomphe, Basilique Du Sacre-Coeur de Montmartre.

DAY 4

Morning Arrival in Lille.

Topic of Discussion: French Renaissance revival architecture and its influence on the global architectural movement.

Places to visit: Notre Dame de la Treille, Stock Exchange building (outside visit), Chambre De Commerce, Citadelle de Lille.

Cultural visit: Old Town.

DAY 5

Topic of Discussion: The rise of contemporary modernism in a classical background.

Places to visit: Museum of Modern Art, Villa Cavrois, Euralille Youth Center.

DAY 6

Arrival in Barcelona.

Topic of Discussion: Historic evolution of Catalan and Spanish architecture.

Places to visit: Barcelona Cathedral and Gothic Quarter, MACBA, Casa Mila, Casa Batllo.

Cultural visit: Parc Guell, Portal De L'angel, Carrer D'Avinyo.

DAY 7

Topic of Discussion: Urban planning, Barcelona city grid and the concept of superblocks.

Places to visit: Sagrada Familia, Agbar Tower & Design Museum of Barcelona (outside visit), Bunkers del Carmel.

Cultural visit: Passaeig de Gracia.

EXPERIENCE OVERVIEW

DAY 8

Topic of discussion: External global influences in Barcelona's architecture.

Places to visit: El Pabellón de Barcelona, Caixa Forum, Santa Catarina Market, Forum Building & Museu Blau.

Cultural visit: Las Ramblas, Mercat dels Encants, Botanical Gardens, Bac de Roda bridge.

DAY 9

Topic of discussion: The varying degrees of modernism in present-day Barcelona.

Places to visit: Walden 7 (outside visit), Natural History Museum, Palace of Catalan Music.

Cultural visit: El Born, Placa de Sant Josep Oriol.

DAY 10

Morning arrival in Rome, Italy.

Topic of Discussion: Understanding Rome's Historic Layer.

Places to visit: Colosseum, Foro Romano.

Cultural visit: Trajan's Market.

DAY 11

Topic of Discussion: Romanesque architecture due to the rise of monasticism and the blend of Renaissance, baroque and neoclassical architecture.

Places to visit: Vatican City – St. Peter's Basilica and Square, Necropolis, The Vatican Museum and Sistine Chapel.

Cultural visit: Apostolic Palace, Pauline Chapel.

DAY 12

Topic of Discussion: Contemporary architecture and the global context

Places to visit: Maxxi Museum, Auditorium Parco della Musica (outside visit), Church of 2000 (Jubilee Church).

Cultural Visit: Mercado de Porta Portese, Tor Marancia Street Art, Corte Suprema Di Cassazione.

DAY 13

Topic of Discussion: Understanding material usage in the architecture of Rome.

Places to visit: The Pantheon, Chiesa de Santa Susanna, Fontana De Trevi, Piazza Del Campidoglio.

Cultural Visit: San Carlo alle Quattro Fontane, Palazzo Farnese, Scalinata di Trinità dei Monti (Spanish Steps), Chiesa di Sant'Andrea al Quirinale.

DAY 14/15

Culmination of project work / Free Day.

Departure to India or home country.

Curator -
Ar. Rachita Bhonsle
(B.Arch)

CURATOR & TOUR LEADER

The Architecture Experience Japan is curated by Rachita Bhonsle, who will also be accompanying the participants on the tour. Rachita is a senior architect at a private firm which specialises in high-rise buildings and high-density residential communities. She has a background in environmental policy management, sustainable design, and energy-efficient planning.

Rachita has worked mainly in the residential, hospitality and educational sectors. She is passionate about climatology-based design, the environmental impact of built spaces and sustainable site planning. These principles have driven her work for the last decade.

Timeline

- 2007-2012 B.Arch, MS Ramaiah Institute of Technology, Bangalore
- 2012-2014 Vishwannath Associates, Bangalore
- 2015 Graduate Certificate Program in Energy and Sustainability – Major in Environmental Policy and Management, University of Denver, Colorado, USA
- 2016 Rogue Architecture, Wheatridge, Colorado
- 2017-2023 Poornakriti Architects, Bangalore

ALUMNI TESTIMONIALS

KRIYA SHAH

4th Year, Appasaheb Birnale College Of Architecture, Sangli
Participant - The Architecture Experience Sri Lanka (Oct 2023)

This was a productive trip, and everything was enjoyable and worth it. Especially the Heritance Kandalama and Lunuganga site visits, and the meetings with Ar. Palinda and Dominic. I feel my planning and design approach has refined, and service-oriented concepts have become clearer - like how a balance between landscape and built environment has to be maintained. I can say I can implement all of what I learned here in Sri Lanka! It was a fun learning process! Thank you, Ankit - your company was pleasing! I had a good time. And Rachita - will always want to learn from you.

KRASHANG GOSWAMI

4th Year, DIT Dehradun
Participant - The Architecture Experience Singapore (Dec 2019)

The overall experience was excellent. In all the places we visited, the learning experience was highly intuitive. The credits for that could be given to the technological advancements in Singapore, and also to the amazing people who accompanied us on this trip. We got to dive into the Urban development and housing aspects of Singapore. My experience with Reena was amazing. She helped and guided us about everything, and helped us in understanding all the aspects. All the experiences were actually very well integrated, and they complimented each other. So personally, I liked the entire experience. Definitely a 10 on 10!

SARAH SULEKHA

Architect
Participant - The Architecture Experience Japan (July 2023)

The learning experience was not only with regards to architecture, it also included learning about the social and cultural environment. I loved how the trip was very social wherein I got to experience both contemporary and traditional cultures in parallel and also get the opportunity to interact with architects like Florian Busch as well as with the locals. Hats off to Rachita for being so patient and positive in every situation. She made me feel very comfortable and that helped me to have a good time. The team was very enthusiastic and comfortable to work with. The accommodation, transportation and every other basic need was very comfortably organised with the cost in consideration.. The team was very enthusiastic and comfortable to work with. The accommodation, transportation and every other basic need was very comfortably organised with the cost in consideration.

SHHRRUTI JAIN

Architect
Participant - The Architecture Experience Sri Lanka (October 2019)

Studio and site visits were very well organised but what I loved the most were the interactive sessions that we had with various artists and architects in Sri Lanka. Conversations with them were an extremely enriching experience. I got a better understanding in material selection, and the integration of nature in the landscape was eye opening. Prithy and Kshitija curated the experience extremely well and I got to learn a lot from them. About the places as well as the field in general. It was a great experience altogether! Very well planned especially keeping in mind the fact that we were here for a decent number of days and have almost covered everything ranging from the historic places to the modern ones. This trip was worth the money and will definitely influence my design in the future.

SUSTAINABLE DEVELOPMENT GOALS

All our Experiences are aimed at implementing and solving the 17 Sustainable Development Goals set by the UN.

Goal no. 17, Partnerships for the Goals, is key to our Experiences, since we work with a global team of experts to be able to add value to the learning of the participants.

The Architecture Experience focuses on 3 of the Goals primarily -

Goal 9: Build resilient infrastructure, promote sustainable industrialization and foster innovation

- Develop quality, reliable, sustainable and resilient infrastructure, including regional and transborder infrastructure, to support economic development and human well-being

Goal 11: Make cities inclusive, safe, resilient and sustainable

- By 2030, ensure access for all to adequate, safe and affordable housing
- By 2030, enhance inclusive and sustainable urbanization and capacity for participatory, integrated and sustainable human settlement
- By 2020, substantially increase the number of cities and human settlements adopting and implementing integrated policies and plans towards inclusion, resource efficiency, mitigation and adaptation to climate change, resilience to disasters

Goal 12: Ensure sustainable consumption and production patterns

- By 2030, achieve the sustainable management and efficient use of natural resources
- Support developing countries to strengthen their scientific and technological capacity to move towards more sustainable patterns of consumption and production

THE HAPPY LLAMAS

At **The Happy Llamas**, we curate Experiences for participants to show them how their domains work in the real world, and how they approach sustainability. Why?

We believe that the world has a lot to offer, and only on going out and engaging with different cultures in different corners of the world can one get a holistic view of life, and evolve personally and professionally. We also feel strongly about the need to make this planet, the only one that we have, more sustainable.

Keeping these two thoughts in mind, we work with domain and subject matter experts to co-curate Experiences where we inspire today's youth on how to make this world a better place to live for themselves and their peers, and creating positive global impact in their domains of interest.

We invite you to join us in this journey, and be a part of an inclusive and global community of changemakers!

WE ADHERE TO WORK TOWARDS THE SUSTAINABLE DEVELOPMENT GOALS

MAXXI Museum by Zaha Hadid Architects
Photo by Iwan Baan

“

A building can only be understood by moving around and through it, and by experiencing the modulation, and feel the spaces one moves through - from outside into verandah, then rooms, passages, courtyards. Architecture cannot be totally explained but must be experienced

”

GEOFFREY BAWA
